General Diagnosis by Dr. Murphy

(Not Surgical Alone)

—that is what you now get in every volume of Murphy's Clinics—a wealth of material on *general diagnosis* you can apply in *your* practice. You get those methods of diagnosis that have made Dr. Murphy famous the world over—described in graphic detail by Dr. Murphy himself.

You get such material as the diagnosis of empyema; of tubal pregnancy (including the Abderhalden test); diagnosis of pregnancy in a tube or in a bicornate uterus, with fibroids; the differential diagnosis between the primary and secondary anemias; differential diagnosis of ileus; the use of the cystoscope in the diagnosis of vesical papillomata; the diagnosis of pancreatic cyst; a sure means of differentiating appendicitis, cholecystitis, and ascending urinary infection; the differential diagnosis between malignant and benign breast tumors, between gastric and duodenal ulcers; the diagnosis of ovarian sarcoma—and hundreds of other subjects of great importance, to every medical man. And in addition you get **treatment—Murphy's treatment—**such subjects as the use of vaccines and serums; the treatment of appendicitis, of joint infections; all of Murphy's bone and joint work, genito-urinary work, gynecologic work, post-labor complications—a wide field covered from every angle. Wouldn't such a work as this be of great help to you? Order your Murphy's Clinics to-day!

Issued serially, one volume every other month (six volumes a year). Each volume about 200 octavo pages, illustrated. Per year: \$8.00; in cloth, \$12.00. Sold only by the calendar year.
